

ANNUAL REPORT 2023-24

Formed in December 2021 by enthusiastic and motivated group of Doctors and Healthcare Professionals, who realized the need to upgrade the Primary Healthcare infrastructure in India.

PHCF was structured around the idea of providing unbiased, basic preventive and diagnostic healthcare services to the rural population in India at their door step. Implementing healthcare at the grass-root level will invariably benefit our working population in all spheres of life.

It is important take the Primary Healthcare to doorsteps of communities as they find it extremely difficult to reach out to Government and other healthcare facilities.

Our Vision

To be the Flag bearer Non- profit Organization of Responsible & Equitable Primary Healthcare and Preventive Public Healthcare Outreach Initiatives and Policies and Programs, with widest reach to the communities so as to make them Healthy, addiction free and empowered.

Our Mission

Reach out to communities at their door step and provide effective and efficient Primary healthcare facilities and also work towards education, culture, hygiene and environmental conservation.

1) Health Screening Projects

Health Screening Projects for children, Forest Guards and elderly people in MP and Maharashtra.

2) Partnering with likeminded NGOs

PHCF believes in partnering with other Organizations so as to achieve common goal of reaching to masses for provision of Healthcare services.

This includes,

1 Operations of Mobile Medical Units (MMUs)

PHCF operates MMUs behalf of other NGOs due to its capabilities in Healthcare and overall Management of operations. Currently, four MMUs are being operated in Sambhaji Nagar regions in Maharashtra. Two more MMUs and one Mobile cancer screening Unit will operational in the month of July 24. The operation include recruitment of staff, induction, training, planning and monitoring the operations and reporting achievements against the set performance targets, reporting the same as well as maintaining and reporting of accounts

2 Capacity Building

PHCF successfully completed several projects on capacity building of other NGOs, mainly in the field of Healthcare and Management. This includes Doctors, Nurses and Project Associates such as Project Coordinators, Drivers / helpers

3 Development of Software

With domain knowledge of primary healthcare and other fields, PHCF is in process of developing software s, which can be implemented by other likeminded NGOs to make their operations more effective.

4 Base line and Impact Assessments

PHCF offers assistance to other NGOs for undertaking comprehensive studies such as Base line / Need assessment studies. This includes designing of study, Primary and secondary data collection, analysis, inference and preparation of Project Report.

The assignments also include Village Health Profiling along with Need Assessments.
